

ProACT HS

FOR HOSPITAL SYSTEMS

ProACT HS enables multi-health systems to monitor patients discharged to the skilled nursing facilities in their preferred provider networks. Interventional analytics enables nurse navigators and case managers to collaborate with the skilled nursing caregivers to improve outcomes, reduce readmissions and control costs.

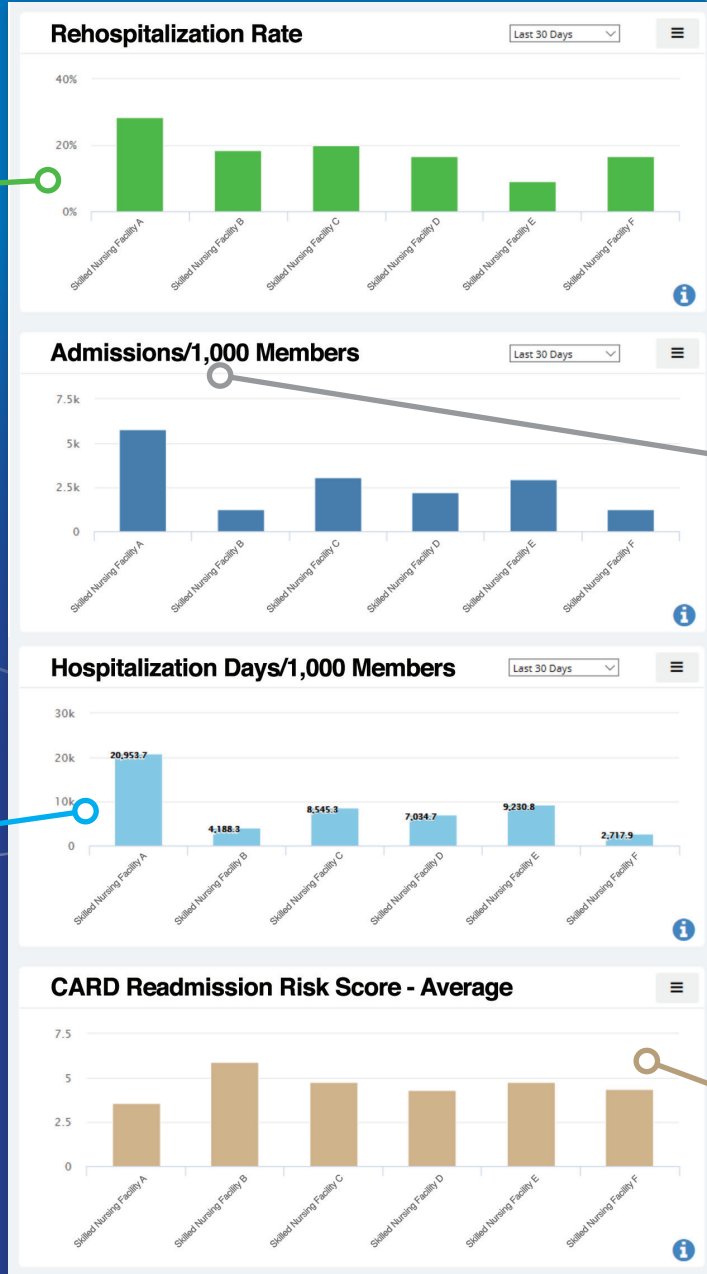

ProACT HHS

FOR HOSPITAL SYSTEMS

DASHBOARD

View readmission rates by facility in real time.

Displays admissions by members in real time.

Indicates the number of days that your members are hospitalized.

Shows which patients are at highest risk for readmission.

Contact us today to learn how you can build and manage your preferred provider network of skilled nursing facilities.
